General Information

ADVANTAGE is designed for professional use only on turf, ornamentals and horticultural crops to help promote robust root and shoot growth.

Rate Recommendations

Turf (such as athletic fields, greens, tees, and fairways): Apply only to actively growing turf. Use 3-6 fl oz per 1,000 sq ft or 1-2 gal per acre (10-20 L per hectare) in sufficient water for thorough coverage. Initiate spraying prior to seasonal stress cycles. Apply at least twice monthly and allow at least 6 hours before/after irrigation event for maximum benefits.

Ornamental and Horticultural (such as flowering ornamentals, landscaping, evergreens, shrubs, trees, and palms, including those grown in nurseries and greenhouses): Mix a 1-2% use solution (2.5-5 tbsp per gal of water or 1-2 gal per 100 gal [1-2 L per 100 L]) and spray foliage to drip. For best results, apply on a regular schedule every other week.

Optimum rate of application will vary depending on soil properties (such as pH, organic matter content, texture), weather conditions, time of year, general plant species and health. For best results, follow soil/tissue test recommendation.
